Check Out Exclusive Lead-Free Checks!

Back in early 2019, Milwaukee Valve obtained ANSI /NSF-61 certification for our 2-1/2" and 3" UltraPure® bronze swing check valves.

**UP509 Bronze
Swing Check (threaded)**

**UP1509 Bronze
Swing Check (solder)**

With that approval, Milwaukee Valve became the only valve manufacturer to produce threaded- and solder-end bronze valves certified to ANSI/NSF-61 in these sizes. The **UP509** and **UP1509** remain the only lead-free check valves produced with ASTM B584 compliant materials in the industry.

These valves contribute to what is arguably the broadest product offering in lead-free copper alloy valves among all our competition. And, as you can see, they're in stock!

For pricing and lead-time information, contact your **[Milwaukee Valve sales representative](#)**. For more information on lead-free check valves, visit the **[Milwaukee Valve](#)** website.
