

The More You Know

May 15, 2024

Speaking The Same Language...

One complaint from distribution customers is that mistakes in sales orders occur because the contractor and the counterperson confused a term and the wrong product gets ordered or delivered. As we all know, the PVF marketplace (Pipe/Valves/Fittings) uses a lot of specialized jargon, and this can be downright baffling. Deciphering and understanding this language are important steps toward system design, valve selection and trouble-free installations.

Milwaukee Valve's Director of Marketing, Bob Rudman, will take us through a short review of many of the terms

that you might hear on a daily or routine basis, and may not quite understand what they mean.

Join us next [Tuesday, May 21st](#) to become familiar with more of these terms. The webinar will begin at 1:00 (CDT) and run for about 30 minutes, followed by a short Q&A session. A link to the registration page can be found at the [Milwaukee Valve](#) website today or by clicking [HERE](#).

Registration is required for Live or On-Demand attendance. A link to the first Jargon webinar can be found [HERE](#), but that content is not required for the new webinar.
